

About Us

PIXELPRO Media Solutions is a Mumbai-based Audio-Visual (AV) system integration and high-end technical production company, established in 2014. The company provides end-to-end technical solutions including indoor and outdoor LED displays, Dataton WATCHOUT media-server integration, professional audio, intelligent lighting and complete event production.

With a specialized team of 7 professionals, a central equipment warehouse in Mumbai and ₹1 Cr+ annual turnover, Pixelpro serves corporate events, exhibitions, experiential launches, concerts, festivals and large-scale live productions.

01. Mision

Zero-Latency Visuals: Deliver high-refresh indoor and outdoor LED screens powered by Dataton WATCHOUT servers.

02. Mision

Turnkey Infrastructure: Provide integrated sound, intelligent lighting, and visual solutions through a single source.

Our Vision

To be India's most reliable, one-stop technical production and AV integration partner, setting benchmarks in visual clarity, immersive acoustic coverage, and synchronized show control across live and experiential environments.

Market Problem

Pixelpro Media Solutions addresses the challenges of multi-vendor coordination, technical mismatches, poor-quality visuals, and high logistics costs in the AV and event-production industry. Managing separate vendors for LED screens, sound, lighting and media servers can create communication gaps, execution failures and increased transportation and crew expenses.

01. Multi-Vendor Fragmentation

Managing separate vendors for LED, sound, lighting and media servers creates communication gaps and execution risks.

02. Technical Mismatches

Incorrect LED pixel pitches and unsuitable outdoor screens can lead to poor visuals, dead pixels, and equipment failures.

03. High Logistics Costs

Coordinating equipment from multiple warehouses increases transportation, staging, and crew expenses.

PIXELPRO MEDIA SOLUTIONS

Our Solution

Pixelpro Media Solutions provides a single-source, turnkey AV and technical production solution, integrating LED displays, professional audio, intelligent lighting and Dataton WATCHOUT media servers under one coordinated system. Its centralized Mumbai equipment hub enables faster deployment, seamless show synchronization, reduced vendor dependency and more cost-efficient event execution

1. Turnkey AV Integration

We provide LED displays, professional sound, intelligent lighting and Dataton WATCHOUT media-server solutions through a single coordinated system, reducing multi-vendor dependency

2. Centralized & Rapid Deployment

Our Mumbai-based equipment hub enables faster deployment, efficient logistics and coordinated technical execution for live events and productions.

01

1. LED Display Solutions

High-density indoor and high-brightness, weatherproof outdoor LED displays for corporate events, exhibitions, concerts and live productions.

2. Professional Audio & Stage Lighting

Complete event production with professional concert audio, line-array systems and intelligent lighting fixtures.

02

3. Dataton WATCHOUT & Media Integration

Advanced multi-display playback, pixel mapping, multi-canvas alignment, and synchronized show control for immersive visual experiences.

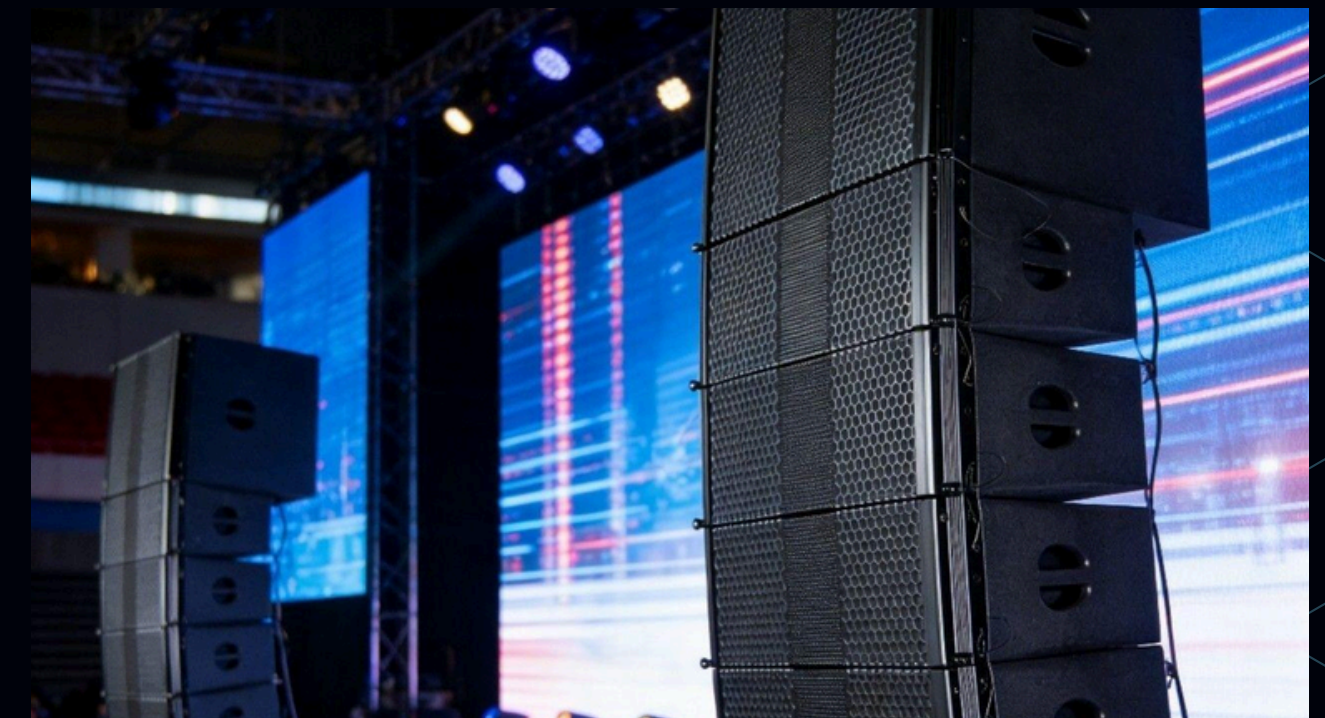

4. Turnkey AV Production

Single-source integration of LED walls, sound, lighting, staging, and technical production, reducing multi-vendor coordination.

Our Offerings

5. System Integration & AMC

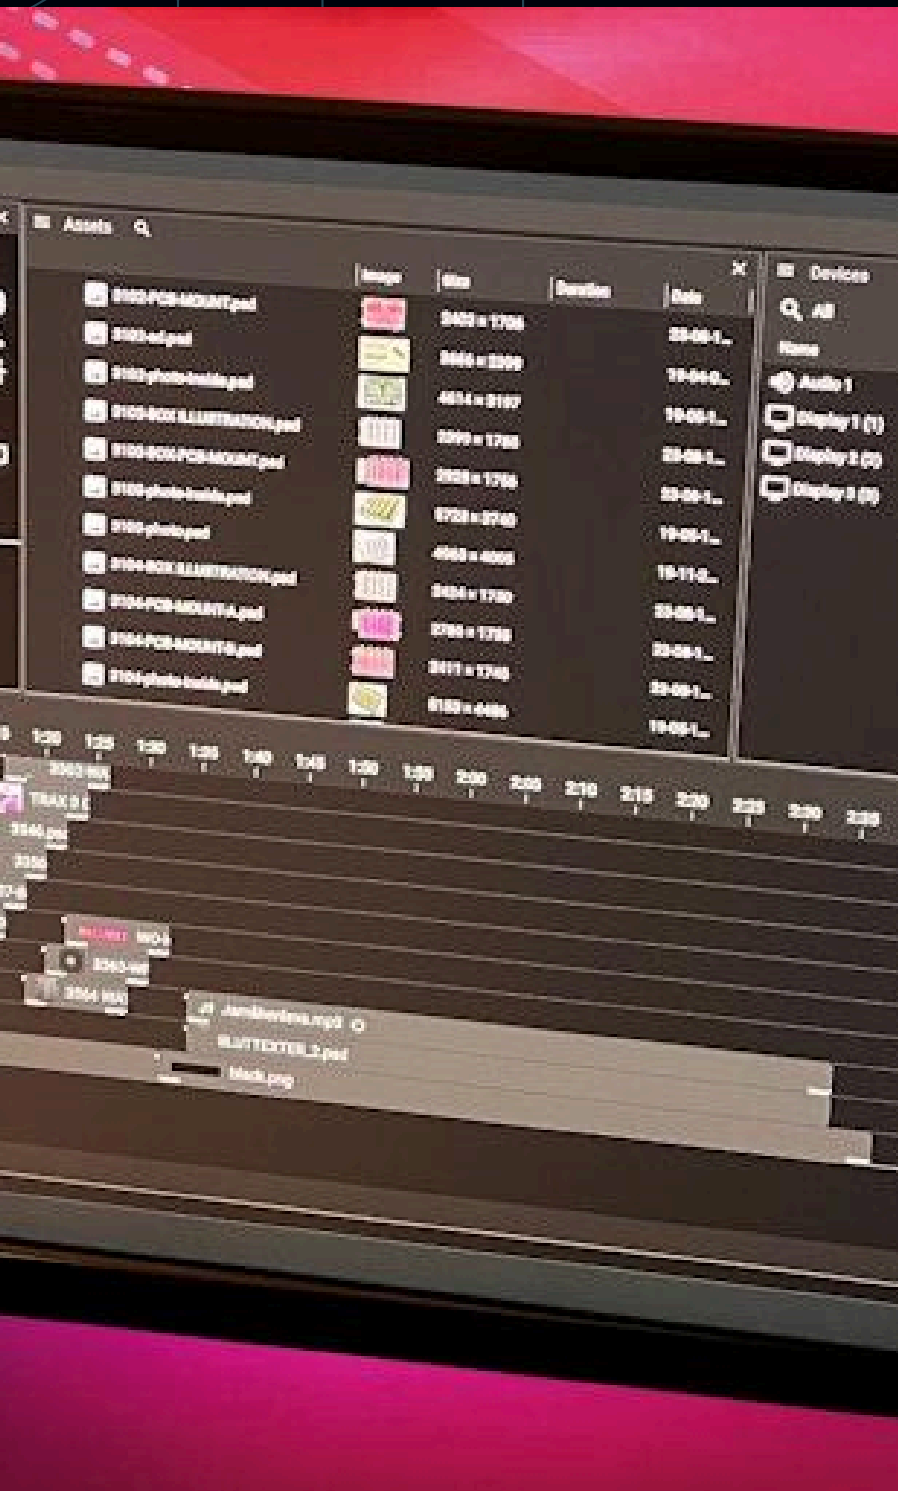

Fixed AV installations, boardroom AV integration and annual maintenance contracts for ongoing technical support.

PIXELPRO MEDIA SOLUTIONS

Competitive Analysis

Key Parameter	Pixelpro Media Solutions	Traditional AV Rental Vendors	Multi-Vendor Event Production
AV Integration	End-to-end integrated solutions	Individual equipment/services	Multiple vendors required
LED Solutions	Indoor fine-pitch & outdoor high-brightness LED	Standard LED options	Depends on vendor
Audio & Lighting	Professional audio + intelligent lighting	Usually separate services	Multiple suppliers
Show Control	Dataton WATCHOUT + synchronized playback	Limited / project dependent	Coordination across vendors
Vendor Dependency	Single-source technical command	Medium	High
Logistics	Central Mumbai equipment hub	Vendor-dependent	Multiple warehouses
Execution	Integrated & coordinated	Service-specific	Higher coordination risk
Operations	Lean 7-member specialist team	Varies	Larger multi-vendor coordination

01. Experiential & Live Event Agencies

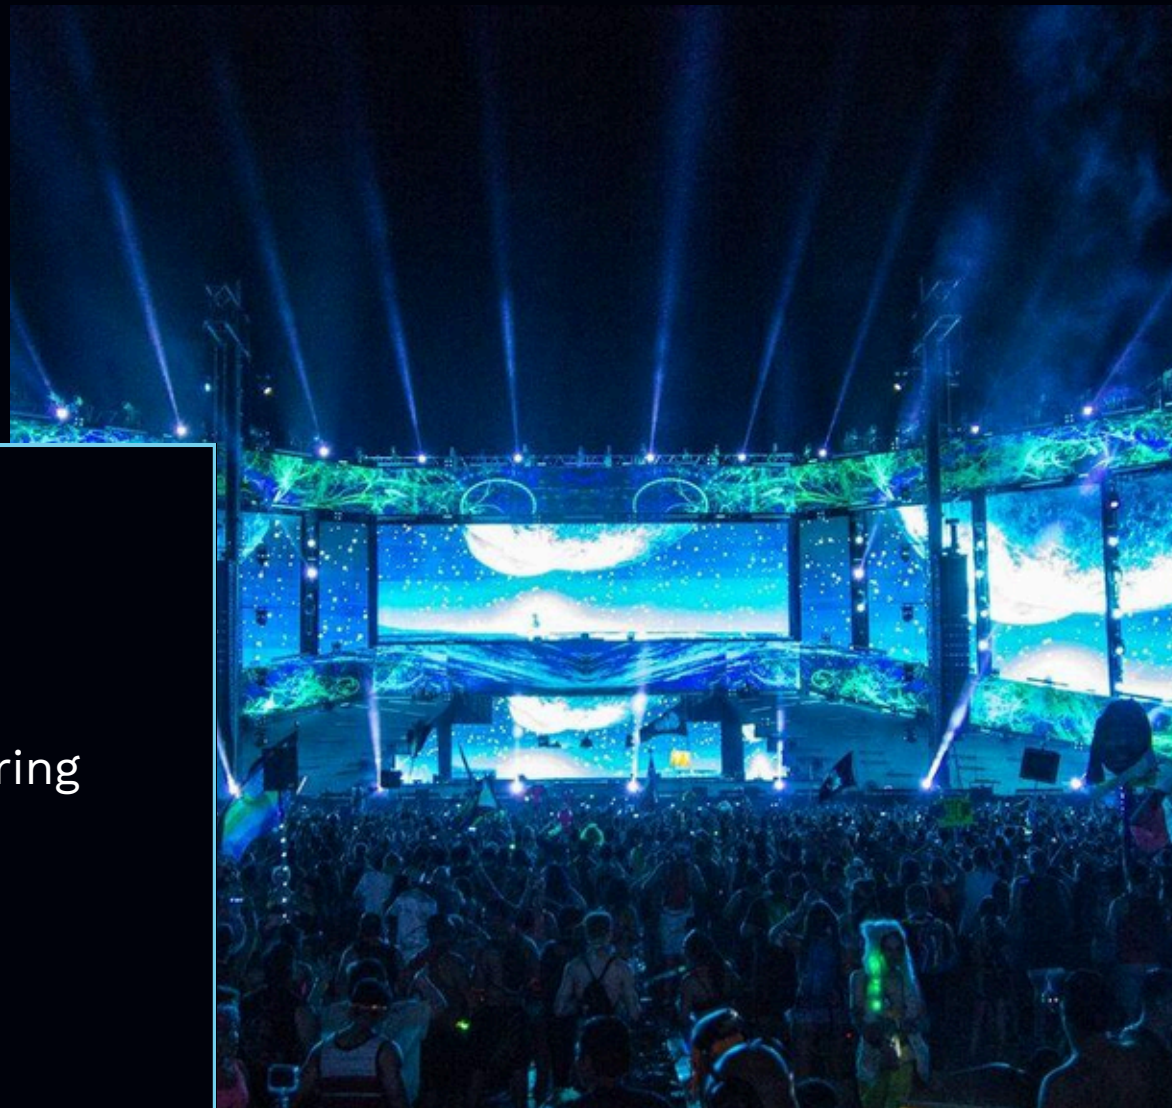

Premium event producers requiring turnkey AV and technical production solutions.

02. Exhibitions & Trade Shows

Large-scale expo booths, conventions, and trade exhibitions requiring professional LED and AV setups.

03. Corporate & B2B Enterprises

Companies hosting AGMs, leadership summits, corporate events, and product launches.

Target Market

Pixelpro Media Solutions serves a diverse B2B market comprising experiential and live event agencies, exhibitions and trade shows, corporate enterprises, and concert, festival and sports producers, providing them with reliable, turnkey AV, LED, audio, lighting and technical production solutions tailored to large-scale events and professional experiences.

Revenue Model

- **LED Display Rentals** – Daily and multi-day rentals of indoor/outdoor LED modules, rigging, and video processors.
- **Turnkey AV Production** – Complete event packages combining LED walls, professional audio, intelligent lighting, and staging.
- **Media Server Integration** – Dataton WATCHOUT programming, pixel mapping, multi-canvas alignment, and live technical show-calling.
- **System Integration & AMC** – Fixed AV installations, boardroom AV integration, and annual maintenance contracts.
